# Enhancing Food Security in the Maldives

**Seeking investments for large-scale agricultural projects**

## **Scope:**

- An earmarked island for the project from Greater Male Region
- Introduction of modern technologies and practices in the sector to increase efficiency, productivity and resource optimization.
- Diversify the economy through expansion of the agricultural sector
- Setting up large scale mariculture farms to maximize benefits from mariculture industry.

## **Developmental Model:**

- Government is open to discuss potential partnerships options for the development of specific business components of the overall project.
- Contractor financed developments, joint ventures as well as other business models are open for discussion.

## **Incentives:**

- Potential to benefit from the SEZ framework

We invite inquiries and proposals from investors who are keen to partner with the Government
